SB 5756 by Senators Jacobsen, Patterson, Horn, Prentice, Finkbeiner, McAuliffe, McDonald, Haugen, Franklin, Kohl-Welles and Carlson; by request of The Blue Ribbon Commission on Transportation

Establishing regional transportation governance.

Finds that many transportation decisions are best made at the regional level, where transportation problems are most paramount. Provides that, in order to minimize the disruption to traffic and damage to the roadway, the department is encouraged to develop a joint trenching policy with other affected jurisdictions so that all companies wishing to lay cable or who otherwise require access to ground under the roadway may do so at one time.

Provides that a person constructing or operating such a utility on a state highway is also liable to the state for all necessary expenses incurred in inspecting the construction and the pavement restoration process used in restoring the highway to a permanent suitable condition for travel.

Franchise holders are also financially responsible to the department for trenching work not completed within the contractual period and for compensating for the loss of useful pavement life caused by trenching.

SB 5764 by Senators Shin, Horn, Winsley, Oke and Haugen; by request of The Blue Ribbon Commission on Transportation

Maintaining and preserving transportation facilities and assets.

Finds that roads, streets, bridges, and highways in the state represent public assets worth over one hundred billion dollars. These investments require regular maintenance and preservation, or rehabilitation, to provide cost-effective transportation services. Many of these facilities are in poor condition.

Declares that, given the magnitude of public investment and the importance of safe, reliable roadways to the motoring public, the legislature intends to create stronger accountability to ensure that cost-effective maintenance and preservation is provided for these transportation facilities.

SB 5772 by Senators Kohl-Welles, McAuliffe, Eide, Winsley, Carlson and Rasmussen; by request of Governor Locke

Changing the authority of the professional educator standards board.

Finds and declares:

(1) Public school educators and administrators should be afforded greater decision-making authority over licensing and standards of practice, responsibilities long held by members of other professions including law, medicine, nursing, engineering, and real estate;

(2) Creation of a public, rule-making body whose sole focus is educator preparation, licensure, assessment, and standards of practice would be likely to bring greater focus and attention to the profession;

(3) Professional educator standards boards are consumer protection boards, establishing policies to ensure the public that its practitioners are competent;

(4) The highest possible standards for all educators are essential in ensuring attainment of high academic standards by all students; and

(5) Granting educators the authority to determine standards for entry to or continuation in the profession of

education could become an important form of acknowledgment of the value of teachers and administrators and would represent the high level of trust, as professionals, that teachers and administrators have earned and to which they are entitled.
